

## #PetsAndPeopleTogether

The bond between people and pets is one of a kind: pets love us for exactly who we are, regardless of where we live, what we look like, or what's in our wallets. They remind us to practice more tail-wagging (or tail-chasing!) joy and compassion, and they teach us to see ourselves the way they see us. They change our lives and the places we live for the better by boosting physical and mental health, fostering belonging and social connection, and helping our communities reach their full potential.

We believe pets help people live better lives. On the front of this page, show us what it means to your life to experience the bond between pets and people.

Answering the question, "More pets and people together, more \_\_\_\_\_?" can be a good way to get your creative tail wagging.
